## The Ultimate Parking Platform

FIND. NAVIGATE. BOOK. PAY. ACCESS.

MYSPOT is a web based mobile responsive digital parking platform that allows your customers to find, navigate, book, pay and access your car park.

The platform has been designed to be a self-managed, allowing building residents, tenants, staff and visitors to manage their own parking needs, thus reducing the administration and management burden for building owners, management and operators.

The MYSPOT platform can be white-labelled and customised to fit your organisation's branding and plugin to your existing online platforms, APPs and websites.

## Innovative Features:

- Dynamic pricing based on demand and number of available bays available
- Gift card and promotion code system
- User specific reporting
- VIP booking portal for building management or tenant's to make bookings on behalf of their staff or tenants.
- Booking grace periods
- Configurable cancellation fees
- Product block out
- Multi-day bookings
- Set number of available bays and price for each day of week
- Access available using LPR, QR, PIN or NFC

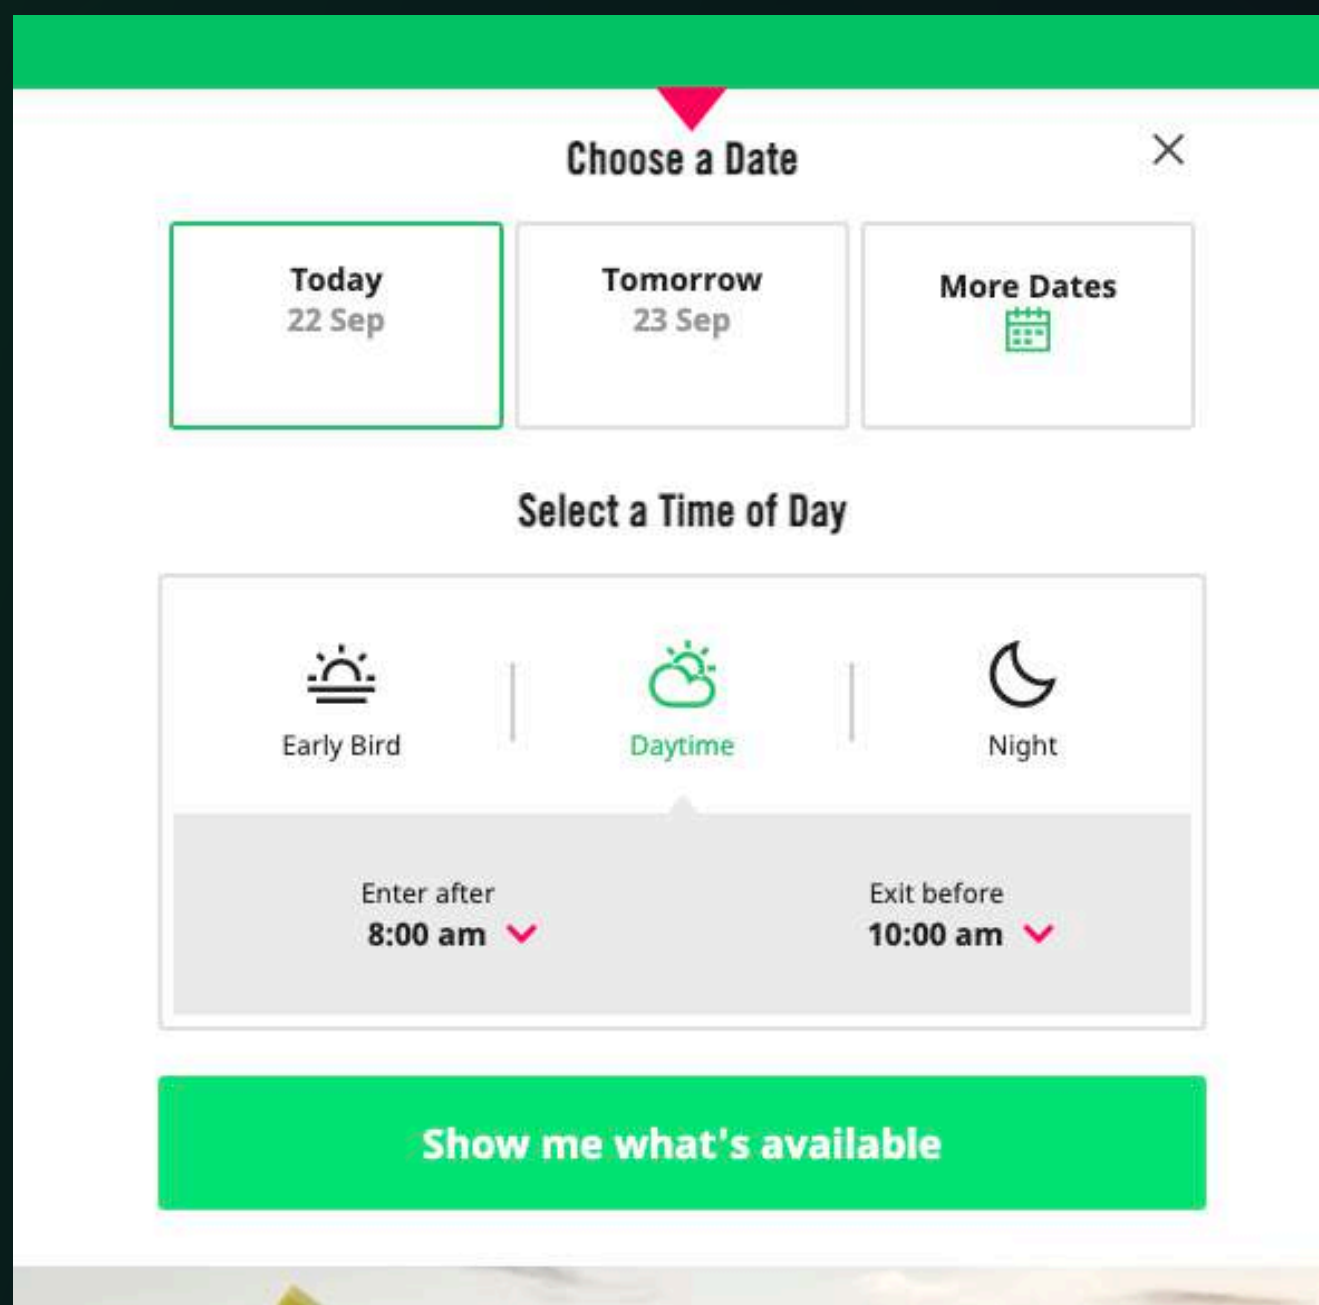

Overall MYSPOT provides a frictionless, user friendly, parking experience that creates a great first and lasting impression of your property.

Further, user insights allow you to better understand your customers.

This way you can improve price points, products and create more effective marketing promotions to drive patronage to your property and further enhance revenues.

## Innovative Features:

- Generate loyalty
- Contactless access
- Generates a customer database
- Maximise capacity
- Encourages online payments
- Understand your customer behaviours
- Access available using LPR, QR, PIN or NFC

## 1 Register

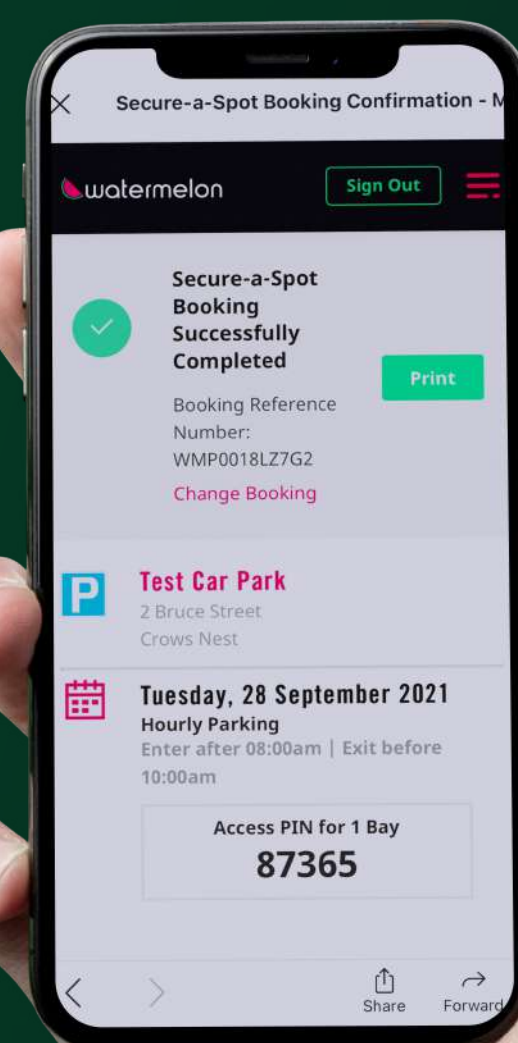

Customers can easily register an account online.

Here they will provide contact and payment details and proceed to make new or re-book favourite bookings.

## 2 Booking Confirmation

Customer receives a booking confirmation email and SMS.

This will contain booking details and instructions on how to access the property (including options for GOOGLE MAPS navigation and calendar reminder).

**3**
